

## Animal Baby Zoo - Nintendo DS

### Content

Young animals in particular need lots of care and attention – obviously. But what if the animal kindergarten of the city zoo has not got enough money? Your service as keeper is required!

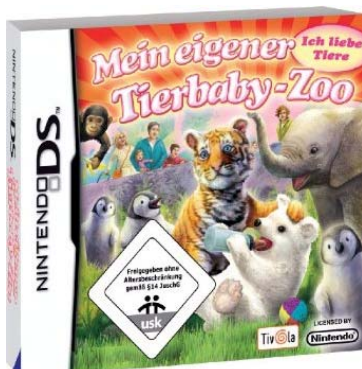

The player has to help the animal babies by making sure that the penguins can always swim in clean water, that the polar bears receive sufficient milk supply and that the elephant kids are growing up in a species-appropriate environment!

If the player manages to take good care of the small ones, he might even be put in charge of a little monkey.

The player can make funny snapshots of the cuddly babies for the local newspaper. That way he will attract more and more visitors into the zoo. That is important - because the more money is made, the nicer he can rearrange the zoo compounds!

### Features

- Baby-animal simulation
- Choose between a male and a female avatar
- Take care of small penguins, elephants and polar bears
- If you are successful you will be awarded with a small monkey!
